Valorizzare gli spazi

Valorising spaces

Dinamici e multitasking, i luoghi del lavoro accolgono funzioni diverse e accompagnano attività che cambiano nel corso della giornata. Sistemi di partizione super performanti contribuiscono a rendere gli ambienti confortevoli garantendo tutte le prestazioni strutturali, visive e acustiche necessarie alla convivenza di persone e azioni.

Workspaces must be dynamic and multitasking to welcome multiple functions and lead many changing activities during the day. Partition systems are efficient and contribute to the comfort of every space, while assuring every structural, acoustic and visual benefit necessary to the coexistence of people.

Parete divisoria doppia Double glass partition

Partizione a doppio vetro che assicura un notevole abbattimento acustico e isolamento termico: per le sue caratteristiche tecniche Double offre la possibilità di gestire rumori, illuminazione e temperatura configurando aree work, meeting e lounge che rispondono a tutti i più elevati standard.

Double Glass Partition that ensures significant thermal and acoustic insulation. Thanks to its peculiar technical features, the double Glass Partition is able to manage noises, illumination and temperature, define work areas, meeting spaces and lounges that respect the highest standards.

La parete Double può essere aggregata alla parete monovetro Glass – il profilo in alluminio ha la stessa altezza e può quindi creare continuità estetica – per offrire soluzioni-parete combinabili e modulabili. La parete può accogliere vetri di diverso spessore e tipologia, pannelli ciechi in legno melaminico e porte a battente, sia anta singola che doppia. Il profilo in alluminio, di serie ossidato argento, può essere fornito nei colori bianco o nero.

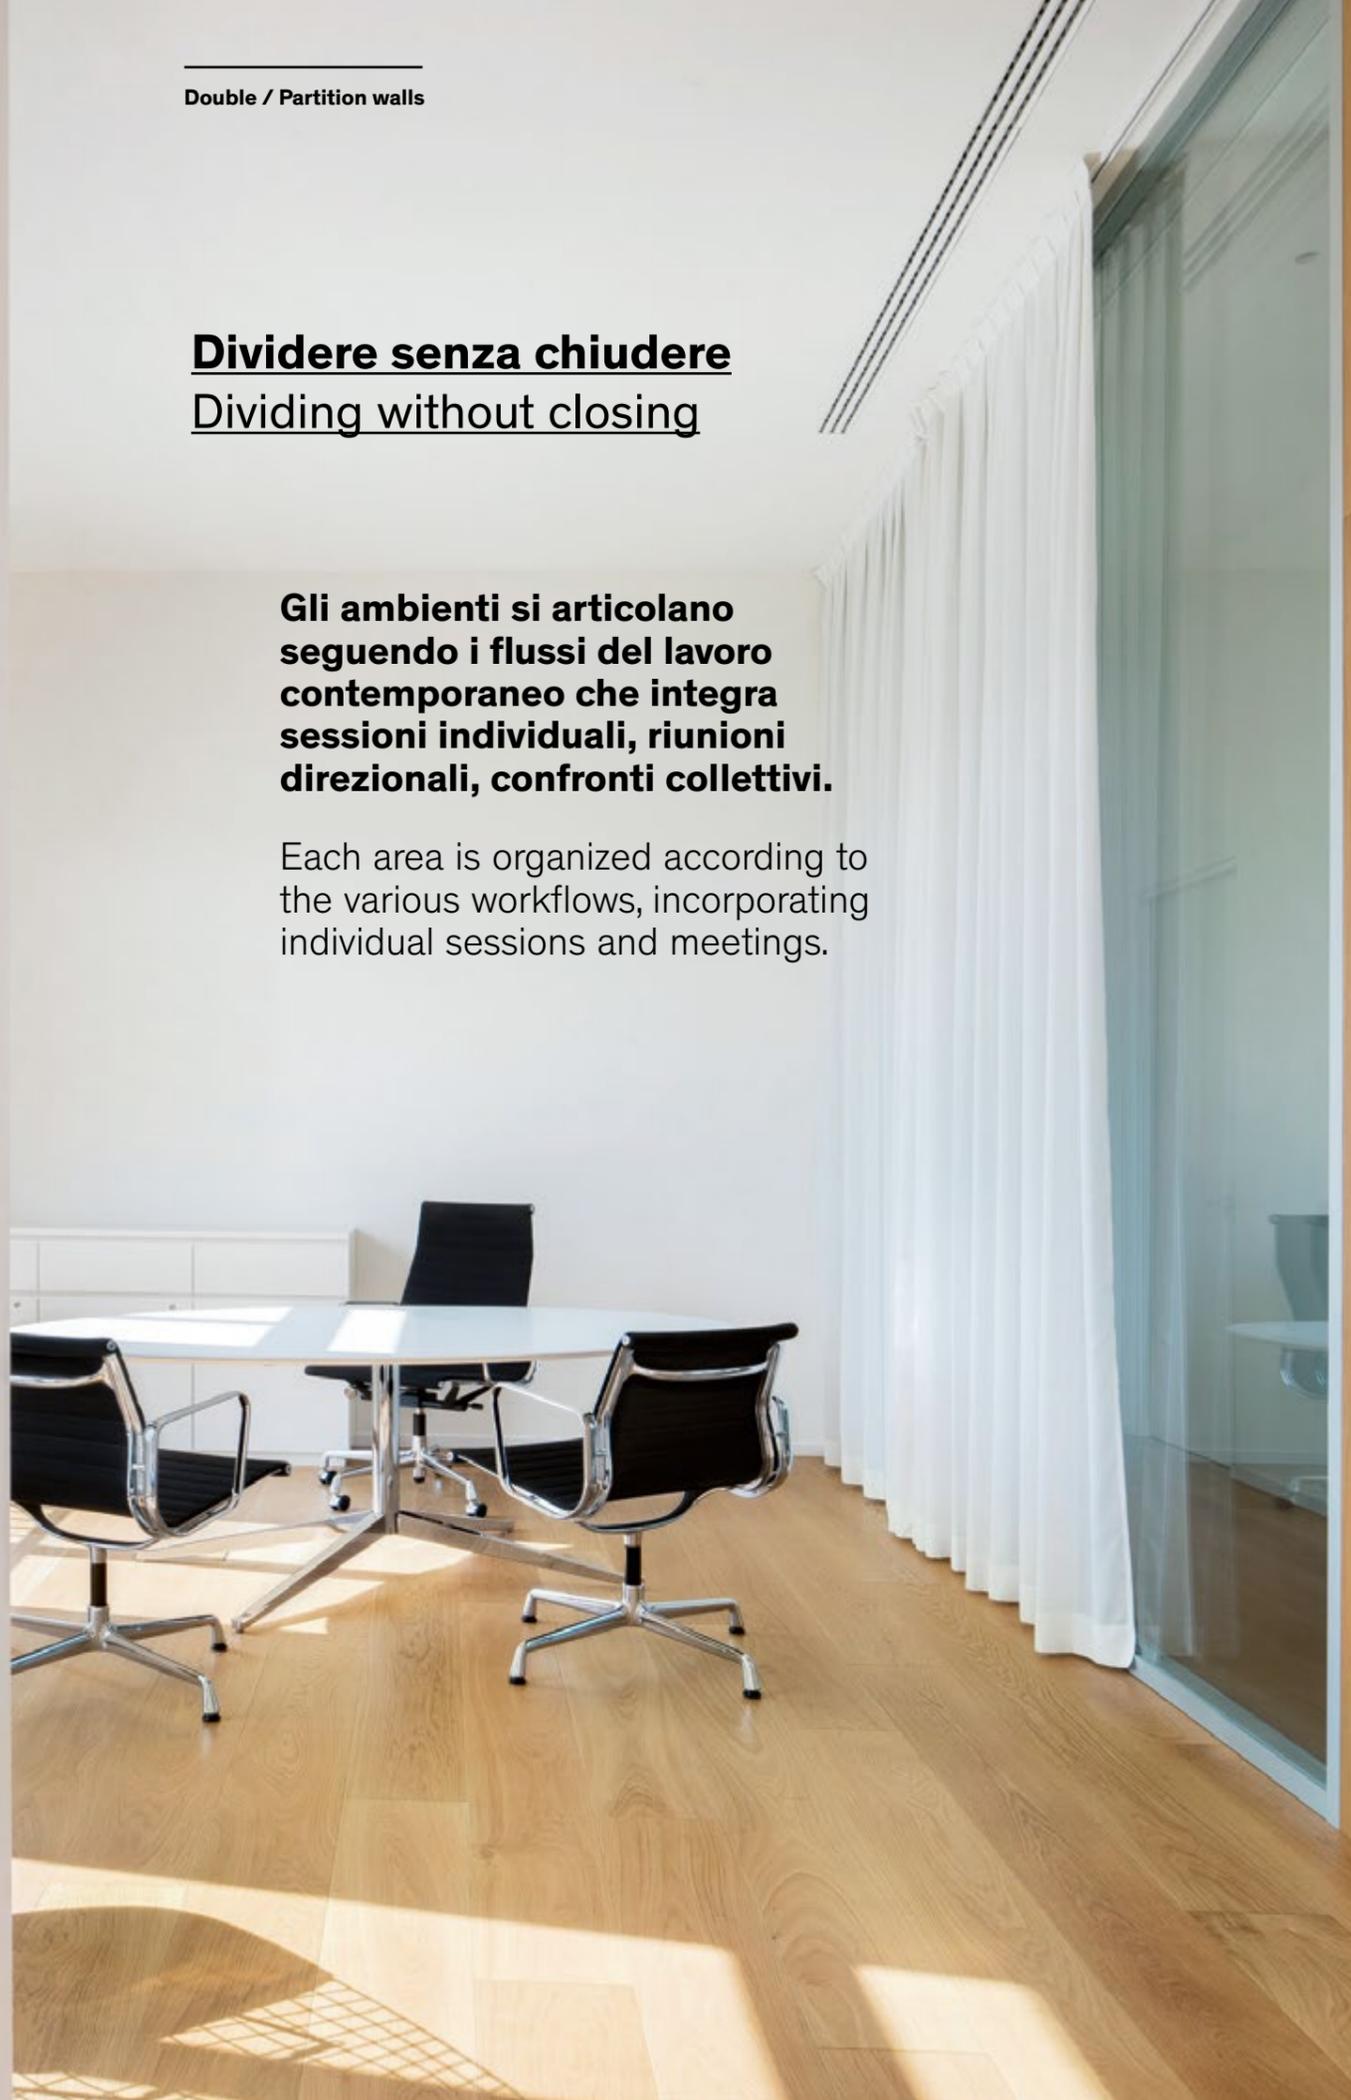

The Double Glass Partition can be placed alongside the single Glass Partition to create adjustable wall solutions, and since the aluminium profile has the same dimension it is possible to maintain aesthetic continuity. This Partition is available in different glass type and depth, with blind melamine panels and hinged doors, both single and double. The standard aluminium profile is in oxidized silver, and is also available in black and white.

Dividere senza chiudere **Dividing without closing**

Gli ambienti si articolano seguendo i flussi del lavoro contemporaneo che integra sessioni individuali, riunioni direzionali, confronti collettivi.

Each area is organized according to the various workflows, incorporating individual sessions and meetings.

Dividing without closing

Configurazioni dinamiche Dynamic configurations

Il sistema di montaggio effettuato con inserimento frontale è pratico, veloce e sicuro; il meccanismo di regolazione dei vetri/pannelli consente, attraverso una specifica soluzione tecnica, di assorbire eventuali fuori-squadra riducendo al minimo le problematiche di cantiere.

The installation system with frontal placement is fast, safe and practical; the glass/panels regulation system allows to connect and reduce eventual defects of the walls through a special technical solution.

La regolazione, indipendente per ognuno dei due lati, è garantita da un sistema a vite che mantiene il vetro/pannello allineato anche in presenza di pavimentazioni e soffitti fuori-squadra, agevolando il montaggio in tutti i contesti architettonici sia di nuova costruzione che in caso di restauro.

Adjustment is granted independently on each side by a screw system which keeps the glass/panel aligned even with non-standard floors or ceilings, easing the installation in every architectural situation, both in new construction sites and in case of renovations.

Schermare senza nascondere **Screening without hiding**

Gli effetti visivi variano in base alle modalità e alle fasi operative per scandire i momenti di scambio, incontro, concentrazione.

Visual effects vary based on operating modalities and phases, to define moments of exchange, meeting and focus.

Trasparenza, luminosità e privacy Transparency, brightness and privacy

Per soddisfare tutte le esigenze di riservatezza, il vetro può essere fornito in diversi spessori trasparente, acidato, extrachiaro, colorato o a cristalli liquidi polarizzato. I pannelli ciechi sono in melaminico disponibili in vari spessori e finiture.

In order to satisfy every privacy need, the glass is available in different thickness, and can be transparent, etched with a film-effect, extra-clear or with polarizing liquid crystals. The blind melamine panels are available in various thickness and finishes.

La giunzione tra le lastre è realizzata con profilo ad H in policarbonato, resistente ai raggi ultravioletti, trasparente con biadesivo che consente di ottenere la massima tenuta e omogeneità tra le superfici vetrate; i pannelli sono uniti tra loro o con i vetri da profili in alluminio.

The joint between glass plates consists in a H transparent polycarbonate profile (UV-lights resistant) with biadhesive, which offers the maximum grip and uniformity between the glass partitions; the panels are connected with each other or with the glass through aluminium profiles.

Screen System, la soluzione brevettata

Screen System,
the trademark solution

Autmind ha messo a punto un sistema per alloggiare tra i due vetri tende tecniche, scorrevoli, a rullo, integrandole a scomparsa all'interno del binario superiore: in questo modo è in grado di gestire diversi gradi di luminosità e visibilità.

Autmind refined an innovative system to place technical sliding roller curtains between the two glass plates, incorporating them with the upper profile. In this way, it is possible to handle different degrees of visibility and brightness.

Lo Screen System può raggiungere fino a 3 m di altezza ed è regolabile elettricamente.

The Screen System can reach up to 3 meters high and is electrically adjustable.

Isolare senza separare
Separating without shutting off

Spazi più permeabili e approccio meno gerarchico necessitano di codici precisi, nel rispetto della privacy e dei ruoli di ognuno.

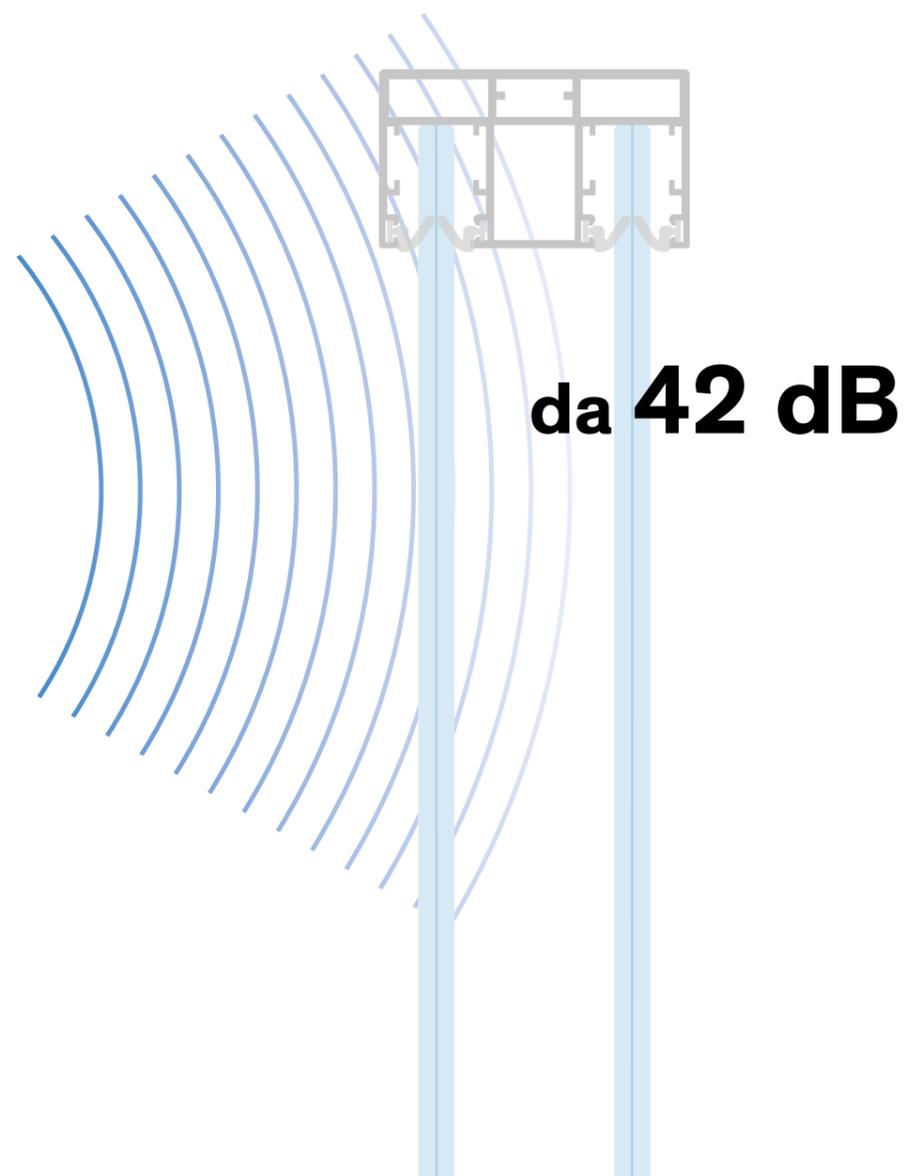

More permeable spaces and less hierarchy need precise rules, with the full respect of everyone's privacy and roles.

Performance acustiche Acoustic performances

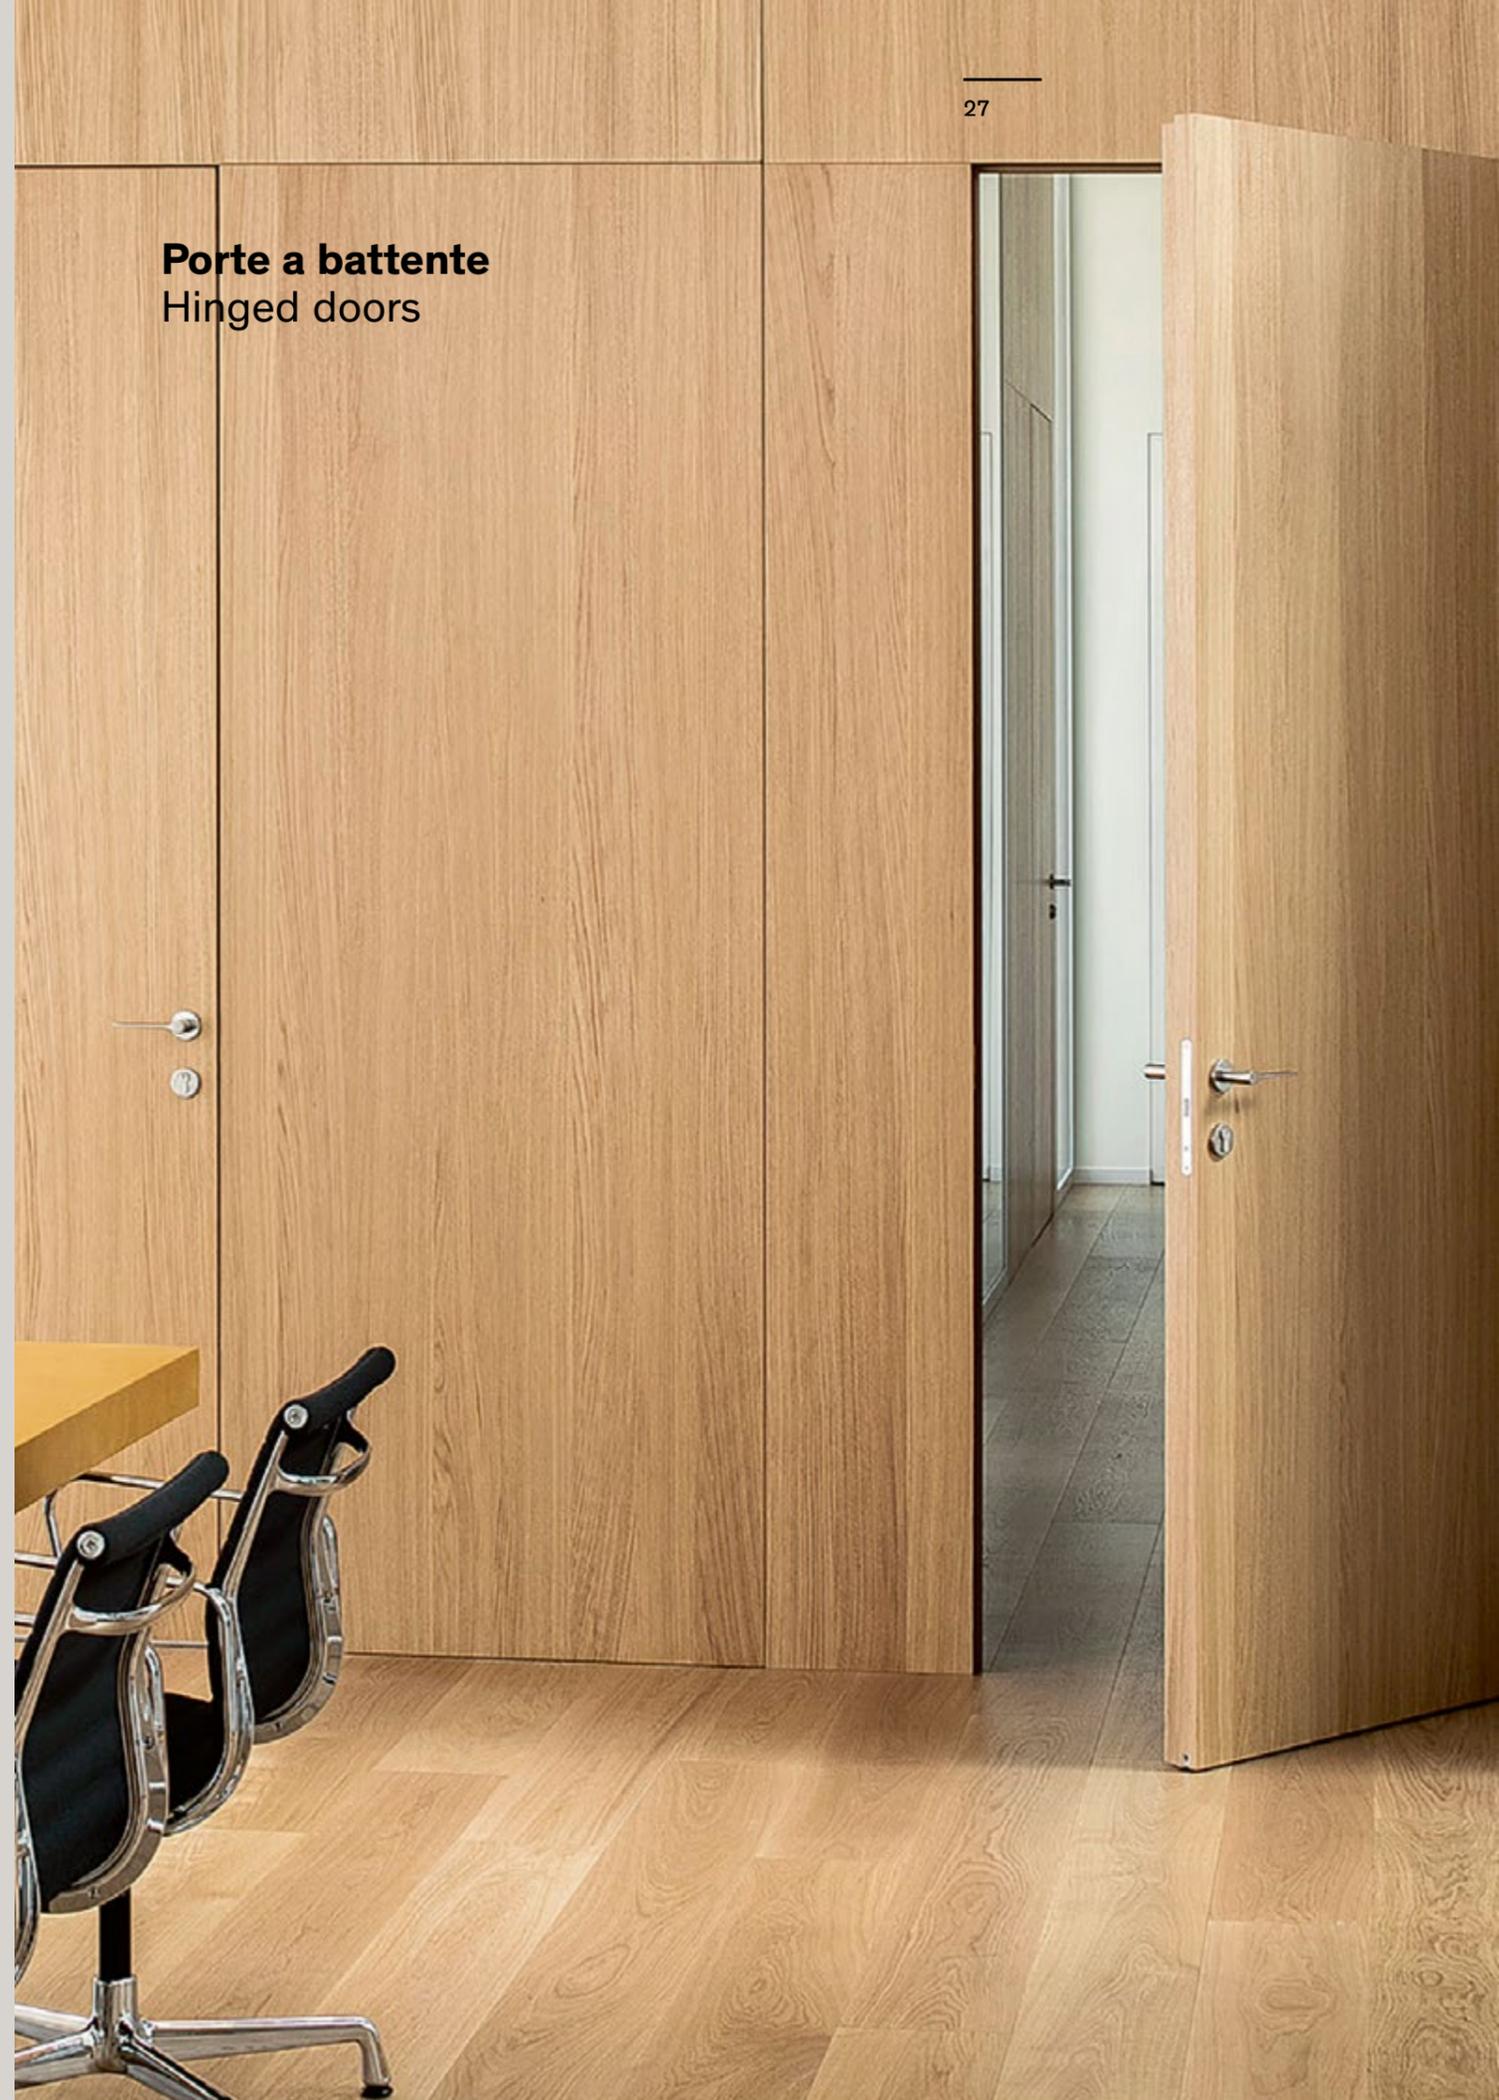

Grazie all'utilizzo di vetri con spessori diversi per ogni singolo lato, la parete garantisce una notevole capacità di abbattimento acustico a partire da 42 dB.

Thanks to the use of glass with different thickness on each side, this partition offers an excellent acoustic insulation, up to 42 dB.

Autmind è un brand di AD Solutions, da sempre sinonimo di alluminio: riconosciuta per l'expertise nei semilavorati, l'azienda ha creato un branch specifico nel settore delle pareti divisorie e la suddivisione degli spazi. Autmind ha all'attivo numerose realizzazioni ed è in grado di porsi come partner per gli studi di architettura nell'intero processo, dalla progettazione alla posa in opera.

Autmind, an AD Solution's brand, has always been synonymous of aluminium: recognized for its expertise in semi-finished products, the company has now created a specific branch in the field of partition walls and dividing spaces. Autmind is currently working on many projects and is able to be an active partner for architecture studios, both in the project phase and in the installation.
